### WordPress Wordcamp

July 25 – July 27, 2014

## {about me}

I am a full time student, projected to graduate at the end of the Fall 2014 semester. My passion for web development stemmed from my own personal interests in the technology field. This brought me to University of Wisconsin-Milwaukee's Student Affairs IT Services Web Development team. Through this opportunity, my studies at school, and personal projects, I have gained significant knowledge in programming and Web Development. I eat, sleep and live code.

## {languages}

#### Proficient in:

Java
