- Followed through with end user to assure that issues were resolved.

SUMMARY

I am a full time student, scheduled to graduate at the end of the Fall 2014 semester. My passion for web development stemmed from my own personal interests in the technology field. This brought me to University of Wisconsin-Milwaukee's Student Affairs IT Services Web Development team. Through this opportunity, my studies at school, and personal projects, I have gained significant knowledge in programming and web development. I eat, sleep and live code.
